

Proud supporter of “Handle With Care”, *providing trauma informed, responsive care to youth.*

Handle With Care (HWC) is a trauma-sensitive community response designed to support children’s mental health and well-being, following a traumatic event. HWC promotes safe and supportive homes, schools and communities, by helping children, impacted by a traumatic event, to heal and thrive.

Through police-school-hospital and community partnerships, we support children who have been exposed to trauma to receive appropriate interventions to help them achieve social emotional and academic achievement.

IT IS EASIER TO BUILD STRONG CHILDREN, THEN REPAIR BROKEN ADULTS.”

~ Frederick Douglas
